Account Executive/Underwriter, Oil & Gas
Job ID: 17517BR

Travelers

Richardson, TX

Company Information

Solid reputation, passionate people and endless opportunities. That's Travelers. Our superior financial strength and consistent record of strong operating returns mean security for our customers – and opportunities for our employees. You will find Travelers to be full of energy and a workplace in which you truly can make a difference.

Job Summary:

Under general supervision, responsible for the profitability, growth and retention of assigned book of business within a territory that is consistent with overall business line objectives. Marketing and underwriting responsibilities typically include: Underwriting new and renewal business on accounts of moderate complexity. As a representative of the company, market to and develop relationships with agents and brokers. Working with other business units as appropriate to support market penetration objectives and seeking out cross-sell opportunities. Independently manages assigned territory. May occasionally seek assistance from a senior level Account Executive or manager on more complex accounts. Takes a portfolio view of their book of business to manage profitability. The incumbent in this job does not manage others.

Primary Job Duties & Responsibilities:

Underwriting and Pricing: Underwrites primarily moderately complex accounts and risks and considers different approaches toward risks to maximize profitability (e.g., pricing, retention, endorsements, limits, indemnity, security.) Uses good judgment in making decisions within own underwriting authority and makes recommendations on other accounts to meet business objectives. Initiates collaborative discussions. **Distribution and Agency Management:** Effectively manages assigned agents/brokers by developing and maintaining relationships to write and retain accounts consistent with business unit appetite. Frequently meets with agents/brokers and insureds in order to build and maintain business relationship.

Sales:

Uses consultative marketing / sales skills and successfully employs a consultative selling approach to market products to agents and brokers. Identifies and captures new business opportunities and effectively cross sells market segment and Travelers products/businesses. Develops agency sales/business plan and frequently partners with MD to develop region/group sales plan. **Negotiation:** Negotiates skillfully in difficult situations. **Executes Strategy and Drives Results:** Develops and executes on a plan to meet business objectives. Anticipates and identifies moderately complex underwriting/marketing problems, thoroughly analyzes available information and makes timely practical decisions. **Business Planning and Collaboration:** Fosters collaboration within the business unit and across the enterprise. Seeks enterprise-wide solutions to business problems. Assists less experienced employees when appropriate. **Leading Others:** In addition to leading self, may coach less experienced

staff members. May participate in the training of less experienced Account Executives. Other duties as assigned.

Minimum Qualifications:

2 years of Account Executive/ underwriting experience required.

Education, Work Experience & Knowledge:

- Bachelors degree preferred. In some lines of business, relevant agent/broker experience may be appropriate.
- Typically has 3-5 years of relevant Account Executive experience.

Previous Oil and Gas underwriting experience preferred. Industry/Business Knowledge: Understands the local insurance marketplace, industry business operations, critical issues and financial drivers that affect the region and local office. Continuously seeks out market insight and uses acquired knowledge to assist less experienced employees. Product

Knowledge:

Understands organizational and regulatory rules, policies and procedures and effectively employs that knowledge in day-to-day work activities. Uses acquired skills and knowledge to assist less experienced employees.

Job Specific & Technical Skills & Competencies:

Business Perspective: Uses knowledge of internal and external factors impacting the property & casualty industry to make decisions. Analytical Thinking/Financial Acumen: Identifies current or future problems or opportunities, analyzes, synthesizes and compares information to understand issues, identifies cause/effect relationships and explores alternative solutions to support sound decision making. Understands and uses financial information, tools and expense management principles to accomplish day-to-day work and maximize profitability. Relationship Management: Seeks out, builds, fosters and maintains productive relationships, networks or alliances to meet goals and achieve results.

Environmental/Work Schedules/Other:

Travel 10-25% of time.

Physical Requirements:

Operates standard office equipment (Continuously) Sitting (can stand at will) (Frequently)
Use of Keyboards, Sporadic 10-Key (Frequently) Driving (Occasionally)

Licensing or Certificates:

Valid drivers license or alternate means of personal transportation. CPCU designation preferred in some lines of business.

Sincerely,

Robert Kesl,

AFP San Antonio Chapter Treasurer Elect

=====

Senior Energy Account Executive
McKinstry

Dallas, TX

Full time

At McKinstry, we're proud to be a collective group of innovators and problem solvers, builders and engineers, mentors and students. We strive to create an engaging work environment that empowers you to do the work you are passionate about.

We believe deeply that energy and facility services, engineering and construction are revolutionizing the built environment – and if you're driven by our mission to transform ideas into meaningful relationships and together, build a thriving planet, McKinstry may be the place for you.

Total collaboration and a diverse, employee-centric work experience are what we can provide you. Integrated delivery and true consultative partnership is what you will help us provide for our clients. Our culture is what differentiates us and because of this, we seek exceptional talent that believes what we believe .

Here's Where You Come In:

We are currently seeking a Senior Account Executive to join the team as a member of our growing South Energy division.

You're Great At

Business Development:

- Maintains thorough records and completes accurate contract initiation.
- Builds and owns market strategies.
- Includes SWOT analysis, competitive analysis and vertical market and horizontal offering strategies.
- Manages larger contracts.
- Maintains sales forecast models.
- Reports identified potential business risk elements and participates in mitigation efforts.
- Creates and delivers processes, standards, and communication channels to increase efficiency.

Client Relations:

- Builds and maintains relationships with industry leaders, associations and organizations in regional or vertical markets.
- Acts as the client's single point of accountability for specific aspects of a project.
- Provides support to the customer with regards to projects financing and contracting issues.
- Guide clients through energy efficiency project financing and contracting processes.
- Utilizes McKinstry's tools and processes to support our customer relationship strategies.

What We Would Like To See From You:

- Intermediate knowledge of Microsoft Office Suite - Word, Excel, PowerPoint, Outlook and Visio required; working knowledge of SharePoint preferred.
- Bachelor's degree in business, engineering, construction management or equivalent business experience required.
- Knowledge of building infrastructure systems, facility management, and critical facilities such as data centers required.
- Working knowledge of the enabling legislation as it pertains to contracting methods such as Performance Contracting, etc preferred.

deliver on its promises through our people, process and technology. Our focus is always on outcomes and results that connect citizens more effectively with government services.

Job Summary:

The Agent will review applications, invoices, and supporting documentation for eligibility determination based on guidelines.

Essential Job Duties:

- *Conducts reviews of applications submitted by schools and libraries for discounts for internet access, internal connections, basic maintenance of internal connections, and managed internal broadband services and equipment received for eligibility based on guidelines provided
- *Processes invoices for discounts on equipment and services according to Program guidelines
- *Communicates with applicants through email, E-Rate Systems and by telephone to obtain the required documentation required to process applications
- *Utilizes desktop procedures, checklists and other documentation to process applications and invoices according to Program rules and guidelines
- *Performs quality reviews of applications and invoices when required to ensure accuracy
- *Escalates issues and questions as they arise when processing Program documents

Education and Experience Requirements:

- * High School diploma or GED required; College degree is preferred
- * A minimum of one year of administrative work experience
- * Proficient in the use of Microsoft Office products
- * Basic knowledge of IT networking and/or infrastructure required
- * Excellent organizational, analytical, written, and verbal communication skills
- * Ability to perform comfortably in a fast-paced, deadline-oriented work environment
- * Ability to work as a team member, as well as independently

* Ability to type 20 WPM

Additional Requirements as per Contract/Client:

* Must be a US Citizen

- High School Diploma with 0-2 years of experience.
- May have additional training or education in area of specialization.
- Works on assignments that are routine in nature, with responsibilities easily learned on the job.
- Acquires job skills and learns applicable policies and procedures to complete routine tasks.
- Able to read, understand & perform assignments within prescribed guidelines.
- Communicates routine information in a clear and accurate way with internal & external contacts.

B. Sr. Software Engineer - Microservices, JAVA

MAXIMUS

Austin, Texas

Full time

MAXIMUS is a leading operator of government health and human services programs in the United States, United Kingdom, Canada, Australia and Saudi Arabia. The Company delivers business process services to improve the cost effectiveness, efficiency and quality of government-sponsored benefit programs, such as the Affordable Care Act, Medicaid, Medicare, Children's Health Insurance Program (CHIP), Health Insurance BC (British Columbia), as well as welfare-to-work and child support programs around the globe. The Company's primary customer base includes federal, provincial, state, county and municipal governments. Operating under its founding mission of Helping Government Serve the People®, MAXIMUS has more than 16,000 employees worldwide.

Job Summary:

MAXIMUS is searching for a Microservices Software Engineer with a strong background in commercial technology product development and hands-on experience in developing enterprise scale Microservices. This position will be part of the software development team and will be responsible for writing code to develop Microservices. Demonstrable experience in developing software application utilizing Microservices architecture, modern tools and emerging techniques is a must. Seeking background in directly managing a small technical team, working with highly demanding product executive management and collaborating with non-technical business operations team.

Job Duties/Responsibilities:

- * Actively participates, contributes, and drives the architecture and solution design
- * Defines work packages for software construction and work with Project Manager to plan the completion of work, by identifying the right resource and negotiating the effort
- * Leads the team by example, assumes the development responsibility of key foundational services and/or API's
- * Works closely with database designers and provides constructive feedback
- * Works on deliverables with inputs and guidance from Development Manager and/or Project Manager
- * Actively participates and contributes in SDLC activities such as work effort estimation, assisting peers, solving technical problems and performing code reviews
- * Understands business processes and develops unit and integration test scenario in accordance with system requirements and business process changes
- * Assists the testing team by providing guidance on how to create test data manually and/or systematically to test software programs
- * Works with the supervisor to understand the assigned work, deliver on agreed upon dates and raises issues/risks in a timely manner in case of risk to deliverables
- * Creates/modifies artifacts and deliverables expected from the SDLC and change management process

Education/Requirements:

- * Bachelor's degree from an accredited college or university in Information Technology, Computer Science, Engineering, or a related field; work experience in lieu of degree will be considered
- * 8+ years of commercial technology product development experience
- * 3+ years of leadership experience either as architect or hands-on technical lead
- * At least 2 years of expertise in leading the technology evaluation, scalability analysis and tool selection efforts for large Enterprise Solution
- * A strong understanding of decomposition of complex business process and creation of micro services
- * Advanced to Expert level proficiency in - JAVA, JPA, Hibernate and MyBatis.
- * Experience building systems with leading commercial databases - ORACLE RDBMS or MySQL or SQL Server
- * Working knowledge of widely used scripting languages - NodeJS, ReactJS, AngularJS, Ruby, Go, Python, Perl. Advanced proficiency in at least one
- * Well versed with Spring frameworks such as Spring IOC, AOP, MVC and Spring Boot for back-end development preferably on Pivotal Cloud Foundry Platform
- * Well versed with Event Driven Micro services Architecture (MSA)
- * Experienced in developing cloud native application & leveraging Spring Cloud services such as, Config Server and Eureka Server
- * Well versed with ORM frameworks like JPA, Hibernate, Spring Data
- * Well versed with messaging platform such as Solace, ActiveMQ etc
- * Familiar with ReactJS and HTML5
- * Experience with application servers such as Tomcat, Jboss
- * Experienced in Unit testing of MSA application with Ci/CD integration within cloud environment
- * Strong software development methodology understanding, and have assisted in the design, development or testing of a technology product development
- * Very good knowledge of application development, testing and deployment methodologies and best practices
- * Experience in working with Agile development methodologies.

- * Strong comprehension of Integration architecture paradigms and SOA governance concepts
- * Eagerness to mentor junior staff
- * Proficient in Microsoft Office (Word, Visio, Project, and Excel)
- * Excellent analytical skills
- * Excellent organizational, interpersonal, written, and verbal communication skills
- * Ability to perform comfortably in a fast-paced, deadline-oriented work environment
- * Ability to successfully execute many complex tasks simultaneously
- * Ability to work as a team member, as well as independently
- * Must be organized and detail oriented

Preferred Knowledge/Skills/Experience:

- * TOGAF Certified
- * Java Oracle Certified Expert
- * AWS Certified Developer
- * Certified Scrum Master or PMI-ACP Experience testing in Agile /SCRUM environments
- * Experience working in mid-large scale projects
- * Experience testing application deployed on cloud native PaaS framework
- * Experience with vulnerability and Privacy testing methods

Physical Requirements:

- * Ability to sit for up to 90% of time
- * Ability to lift or carry objects up to 10 lbs.
- * Frequent use of computer, telephone, and office equipment (copier, fax, scanner)

- Perform scheduled inspections and repair of aviation life support equipment (ALSE) in accordance with appropriate operating manuals
- May be required to perform other duties as required to support the overall mission.

Supervisory Control Over The Position:

The incumbent works under the direct supervision of the Contractor Maintenance Supervisor. The supervisor outlines procedures and policies to be followed in the performance of Government aircraft maintenance. Incumbent receives general instructions from the aircraft maintenance supervisor and exercises initiative coupled with good judgment.

Basic Qualifications:

- Must have been employed as a full-time aircraft mechanic within the past twelve (12) months and hold a current airframe and power plant mechanic certificate.

- Must have completed a minimum of five (5) years experience working full-time as an aircraft mechanic and shall have a minimum of one year in flight line trouble-shooting.
- Must possess a working knowledge of military and general aviation aircraft airframe and engine logbooks.
- Must be competent and knowledgeable in the repair and maintenance of airframes, hydraulics, fuel systems, and aircraft engines.
